The Dynamic Plate Map

The Dynamic Plate Map shows the boundaries between the Earth's tectonic plates. The map is color-coded to show the different types of plate boundaries: convergent (red), divergent (blue), and transform (green). The map also shows the location of major tectonic plates, such as the North American Plate, the Pacific Plate, and the African Plate. The map is a valuable tool for understanding the Earth's crust and the forces that shape it.

THE DYNAMIC PLATE

BOUNDARIES OF TECTONIC PLATES, WITH A HISTORY AND PLATE MOTIONS
